

1. Mark Hole Centers

2. Drill Holes

Drill four
5/32" holes

A line drawing of a door surface with four small circles representing the drilled holes. Two vertical lines are drawn parallel to the door surface, one on each side of the pull's position, indicating the locations of the four holes.

3. Install Pull

Install Pull with
wood screws provided

A line drawing of the door pull being installed onto the door surface. The pull is positioned between two vertical lines representing the door surface. Four screws are shown being driven into the door surface through the oval ends of the pull. A screwdriver is shown driving one of the screws into the top oval end.

Pulls vary depending
on style
